

Secret Tesla

Once upon a time without time at the stroke of midnight

During a summer storm Nikola Tesla was born
His father and his mother's father were priests
He himself wanted to be cut loose, a wireless man
Without regional limits, outside from the zadruga
To extend families was not his destiny

He went to Prague and on to Budapest, from Budapest to Paris
Then he jumped from a not yet existing wireless tower
Across the Atlantic to an Empire State Building still to come
He came back only to bury his mother, back in Gospic
On a day in a time without time schedules
Back in 18 & 19-hundred something

He had no wife and no children, no stories of love
But plenty, plenty of free energy to think & act
He started to close-in on time, that was
Hiding in a infinite dark room called Universe

The Thomas Edison Company engaged Nikola Tesla with small time
He later would invent the world's first alternating current without Edison

Inventor, mechanical and electrical engineer, pioneer
In radio waves, remote control and rotating magnetic fields

Wireless transmission of power to grab at any point of the Cosmos

The phenomenon was too far beyond his Hinklaya mind to be studied closely
But 2, 3 time travels to discovered space and time can lead to other time frames
But no one told no one where Nikola Tesla's notebooks went after his death

When he died Europe was in flames and the nazis were having a holocaust

A state funeral was conducted by the superior of the Church of Saint Sava

While the US was passing around in 1937 of the New Yorker Blaine

Nikola never chose room numbers you could not divide by three... Anyway

The files were declared top secret because of 'the nature of Tesla's inventions'

And time travel was put off to have it trademarked and commercialised in due time
